could boost your capacity and get
you moving even faster forward!

WHAT

- Desktop studies of the seabed (preparation for when the data from NPD becomes available)
- Geophysical investigations, improvement of conventional seismic data and interpretation
- Integrated detailed Ground Models, from planning to operation. Easy access in GeoAtlas Live
- Foundation solutions and optimisation of those foundations for offshore wind turbines and electrical transformer stations
- Planning an optimised geotechnical investigation survey program
- Evaluation of cable-trace from offshore wind park to shore
